INDEX.

Agassiz, Professor, on hybernation, 134—On echinoderms, 135—Zoological researches, 316.

Alps of Savoy and Western Swiss Alps, their formation, by Professor Favre, 101.

Arabian Frontier of Egypt, its physical geography illustrated, by Miss Fanny Corbaux, communicated by the Authoress, 13, 209.

Association of American Geologists and Naturalists, at Boston, September 27, 1847, 131.

Aurora Borealis, their height considered, by G. A. Rowell, 79.—On the Aurora Borealis, by G. A. Rowell, 89.

Balfour, Professor of Botany in the University of Edinburgh, his notice of some rare plants which have flowered in the Edinburgh Royal Botanic Garden, communicated by the Author, 200, 378.

Blood, human, metals in, by M. Millon, 309.

Birds, voices of, considered, 388.

Birds, fossil remains of, in New Zealand, 395.

Bohemian Silurian Rocks, remarks on, by Sir Roderick I. Murchison, 66.

Brongniart, Alexander, biographical sketch of, 92—On the changes of the vegetable kingdom in the different geological epochs, 97.

Browne of Philadelphia, on animal torpidity, 132.

Bruner, K. B., on Scandinavia, 297.

Brussels lace, diseases arising during its manufacture, No. 87, p. iv.

Bubis or Edeeyah of Fernando Po, described by Dr R. H. Thomson, 232.

Buchanan, George, civil engineer, F.R.S.E., President of the Royal Scottish Society of Arts, on the use of the marine hydrometer, 307.

Caffers, described, 386.

Cantor, Theodore, M.D., on the distribution of reptiles in the Malayan Peninsula and Islands, and other localities, 271.

XUM

Ceaird, its explanation, 387.
Chalk formation, presence of phosphoric acid in the subordinate members of, 394.
Changes of the vegetable kingdom in the different geological epochs, by M. Adolphe Brongniart, 97.
Chimpanzees, or *Troglodytes Savagei*, noticed, 388.
Corbaux, Fanny, Miss, on the ancient frontier of Egypt, 13, 209.
Coral Island described, 396.
Crawfurd, John, Esq., F.R.S., &c., on the Malayan and Polynesian languages and races, 155.
Cretaceous series, beds of, containing phosphates of lime, 394.
Crystallization in the dry way, how to procure, by M. Ebelmen, 311.

Davy, Dr John, on the specific gravity of the water of the sea off the coast of British Guiana, 43.—On the temperature of the spider, and on the urinary excretion of the scorpion and centipede, 123.—Agricultural discourse, 335.
Devonian rocks of Bohemia, described by Sir R. I. Murchison, 66.
Diluvian formation of the Vosges, 207.
Dove, M., on the changes of the mean direction of the wind, in the annual period, in North America, 205.

Ebelmen, M. on procuring crystallization in the dry way, 311.
Egypt, its Arabian Frontier considered, by Miss F. Corbaux, 13, 209.

Favre, Professor, on the relative position of the formations of the Western Swiss Alps, and the Alps of Savoy, 101.
Fingoes described, 387.

Gamboge of the Tenasserim Provinces described by the Rev. F. Mason, A.M., 246.
Geology and physical history of the globe, remarks on, 390.
Glaciers, observation on, in pages 138 and 139.—Glaciers of the Himalaya, by Lieut. R. Strachey, Bengal Engineers, 108.
Glass manufacture, curiosities of, 399.
Gutta percha, account of, by Thomas Oxley, Esq., A.B., Prince of Wales Island, Singapore, 286.
—— On the use of, by Michael Farady, F.R.S., 295.

Guyot, M. A., on the distribution of the different species of rocks in the Erratic Basin of the Rhone, 249.—On the topography of the Pennine Alps, 319.

Horn, artificial substitute for, 401.
Hottentots, described, 386.
House-Painting, observations on, by M. Leclaire, 400.
Hydrarchos of Koch and Carus, observations on, 152.
Hydrometer, Marine, on the use of, by George Buchanan, F.R.S.E., &c., 307.

Koch, M. on the Hydrarchos, 152.

Indian Archipelago and Eastern Asia, Journal of, 405.
Indian Archipelago, its present condition considered, 348.

Jameson, William, Esq., on the tea plantations in the N.-W. Provinces of India, 332.
Journal of the Indian Archipelago recommended, 405.

Llamas and Alpacas in Scotland, No. 87, p. iv.
Language, Universal, observations on, 385.
Lichens, the colouring principles of, 401.
Lochaber, on the phenomena in its shelves with those of the Diluvium or Drift, which covers the face of the country, by Sir G. S. Mackenzie, Bart., F.R.S., V.P., R.S.E., Edinburgh, 1.

Mackenzie, Sir G. S., V.P., R.S.E., on the phenomena of Lochaber, 1.
Malayan and Polynesian languages, account of, by J. Crawfurd, Esq. F.R.S., communicated by the author, 155.
Mason, F., A.M., on the gamboge of the Tenasserim Provinces, 246.
Miller, Alexander, of Liverpool, on a new pyrometer, 126.
Minerals, new systematic arrangement of, founded on physical and chemical characters, by R. J., 373.

Oxley, Thomas, on gutta percha, 286.

Patents, list of, granted for Scotland, from 22d December 1847 to 22d March 1848, 405.

Petrifactions of shells in the Mediterranean, by MM. Marcel de Serres and L. Figuier, 50.
Plants, distribution of, remarks on, 389.
Publications, new, received, 403.

Quartz, artificial, observations on, by M. Ebelmen, No. 87, p. iv.

Rocks, their decomposition considered, by M. Ebelmen, 311.
Roger, Professor, on the absorption of carbonic acid by liquids, 149.
Rowell, G. A., on the height of the Aurora Borealis, 79.—On the Aurora Borealis, 89.

Scandinavia, communications respecting the rocks of, by H. K. Bruner, junr., 297.
Sharon, vale of, described, 397.
Skiddaw slate, its organic remains enumerated, 395.
Spider, on its temperature; and on the urinary excretion of the scorpion and centipede, by John Davy, M.D., 123
Stars, shooting, observations on, by Sir J. W. Lubbock, 330.
Stereochromy, account of, 402.

Temperature of the air and the sea, its diminution as we approach the land, 397.

Vosges, its diluvial formation considered, 207.

Water of the sea, its specific gravity off the coast of British Guiana, by Dr J. Davy, 43.
Wind, observations on, by M. Dove, 205.
Wine, melon, observations on, 402.

END OF VOLUME FORTY-FOUR.
